- 7- Conclusion

Project Idea

- Hacker News has many fast-moving technology stories
- Manually checking them is time-consuming
- Our app automatically collects, organizes, and analyzes them
- Added value: classification, priority, charts, CSV export

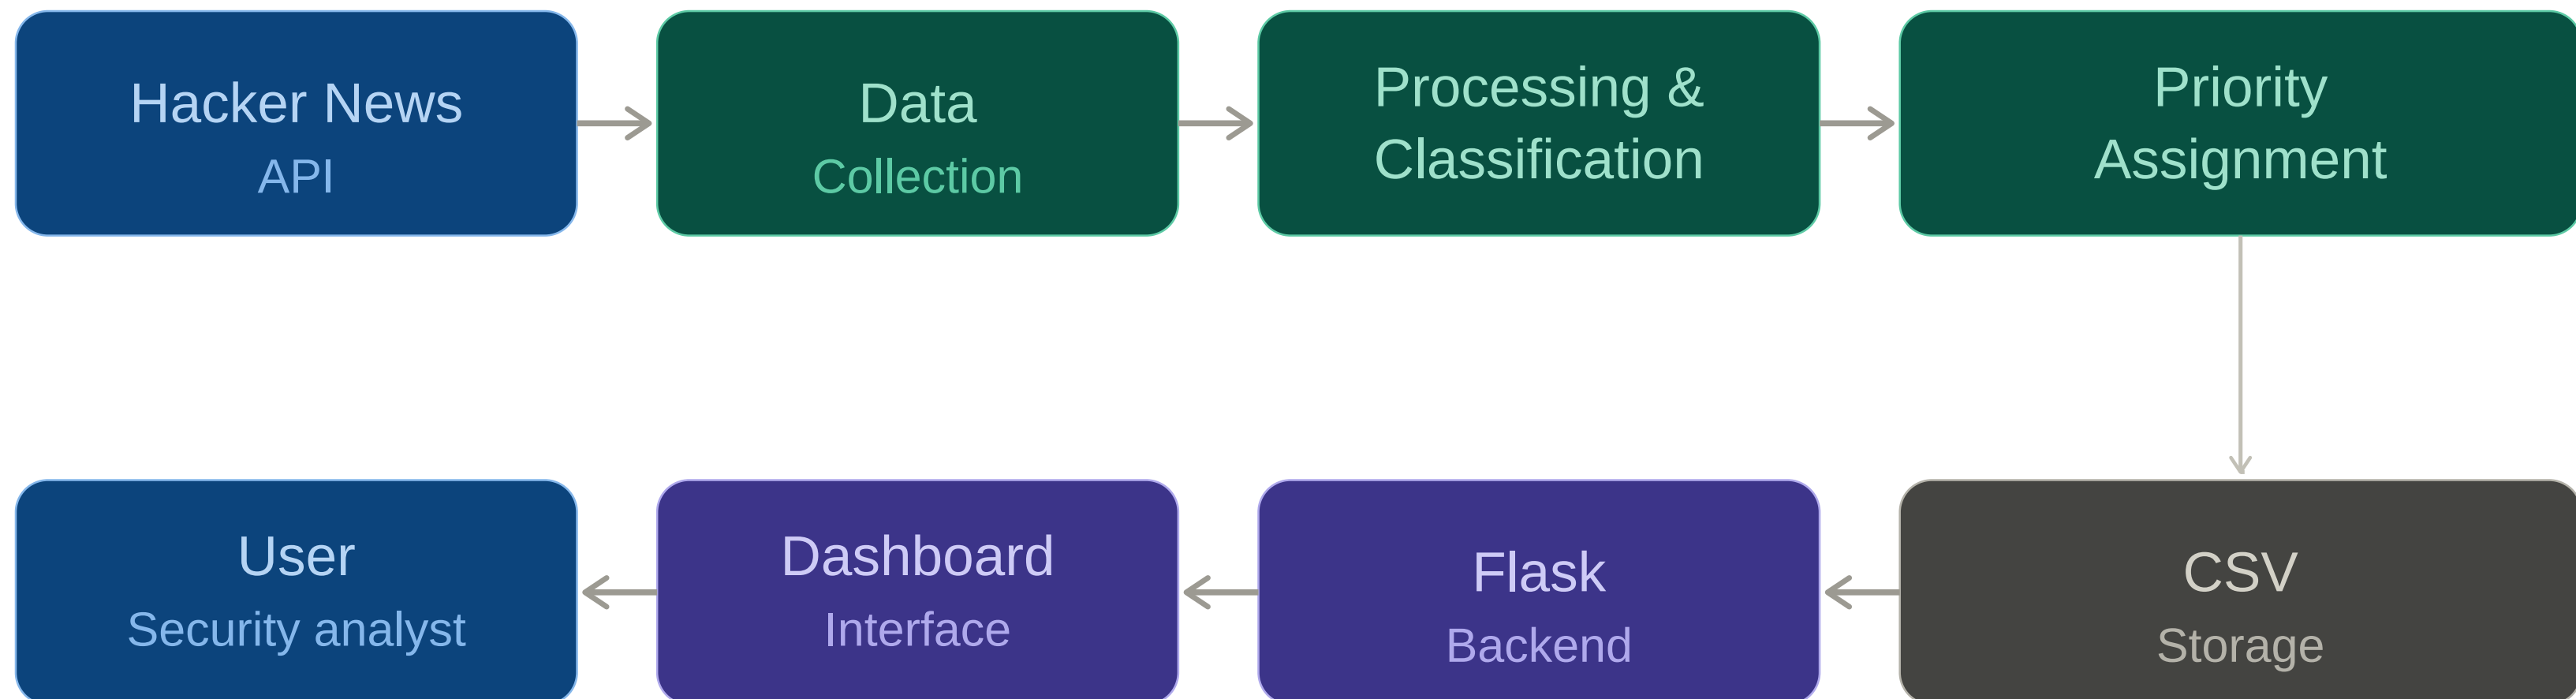

2

Web Scrapping Concepts

- Request
- Extraction
- Processing
- Storage
- Automation
- Ethical use

About

CYBER SECURITY IT360 • PROJECT 8

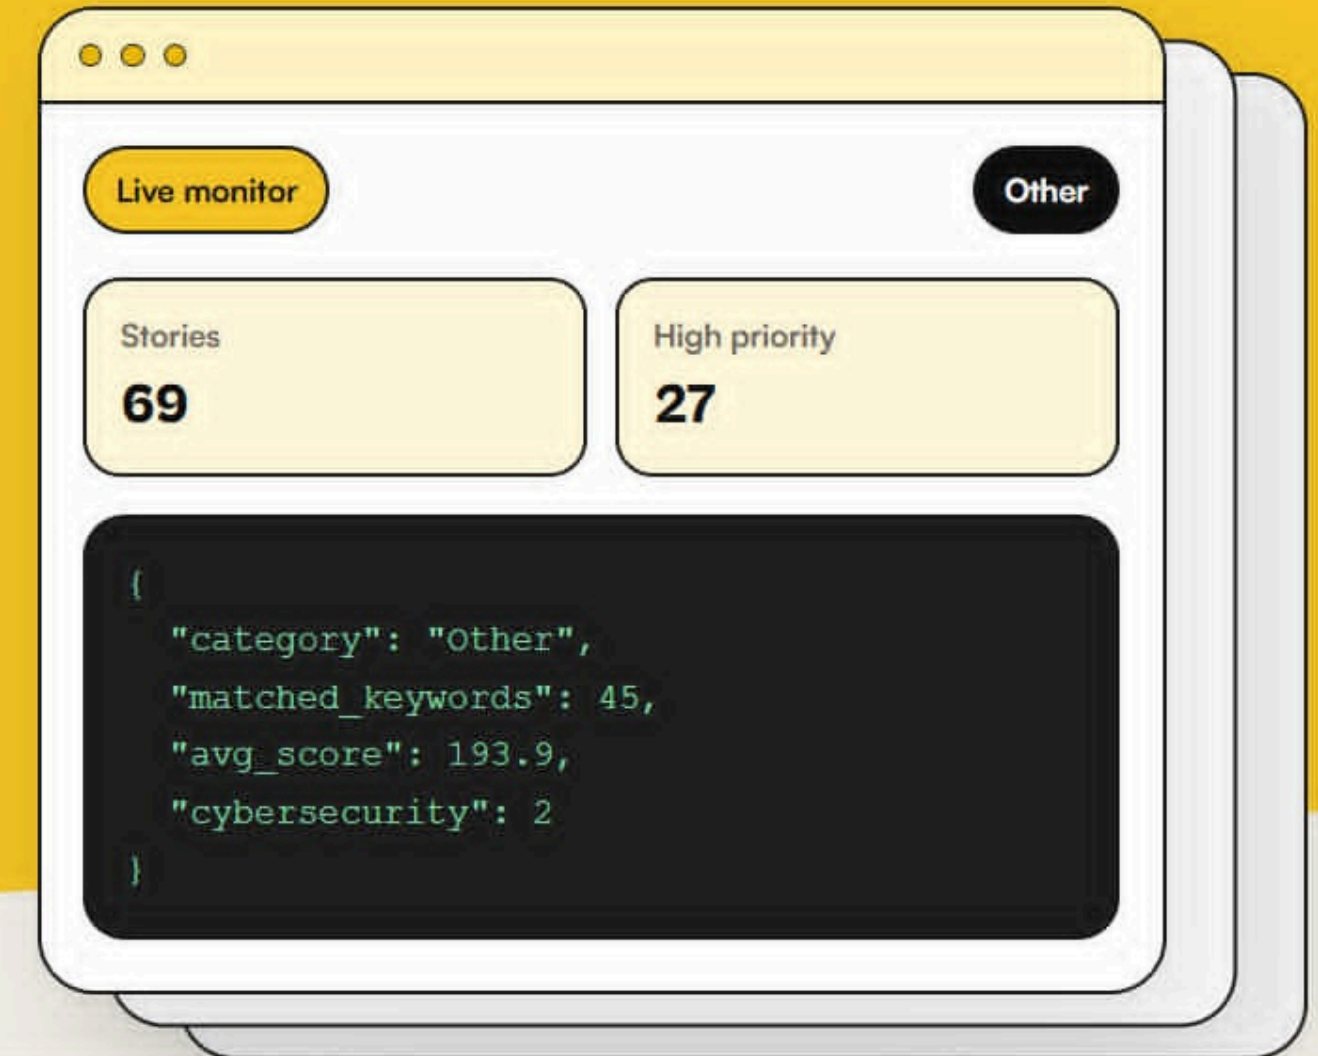

Hacker News Story Intelligence

Collecting, classifying, prioritizing, and exporting top technology stories for structured review.

Review live stories

See how it works

- Live monitoring of top Hacker News stories with structured classification and priority analysis.

Stories collected

69

Total stories retrieved from the

Matched keywords

45

Stories that matched at least one

Average score

193.9

Average community score across

Cybersecurity stories

2

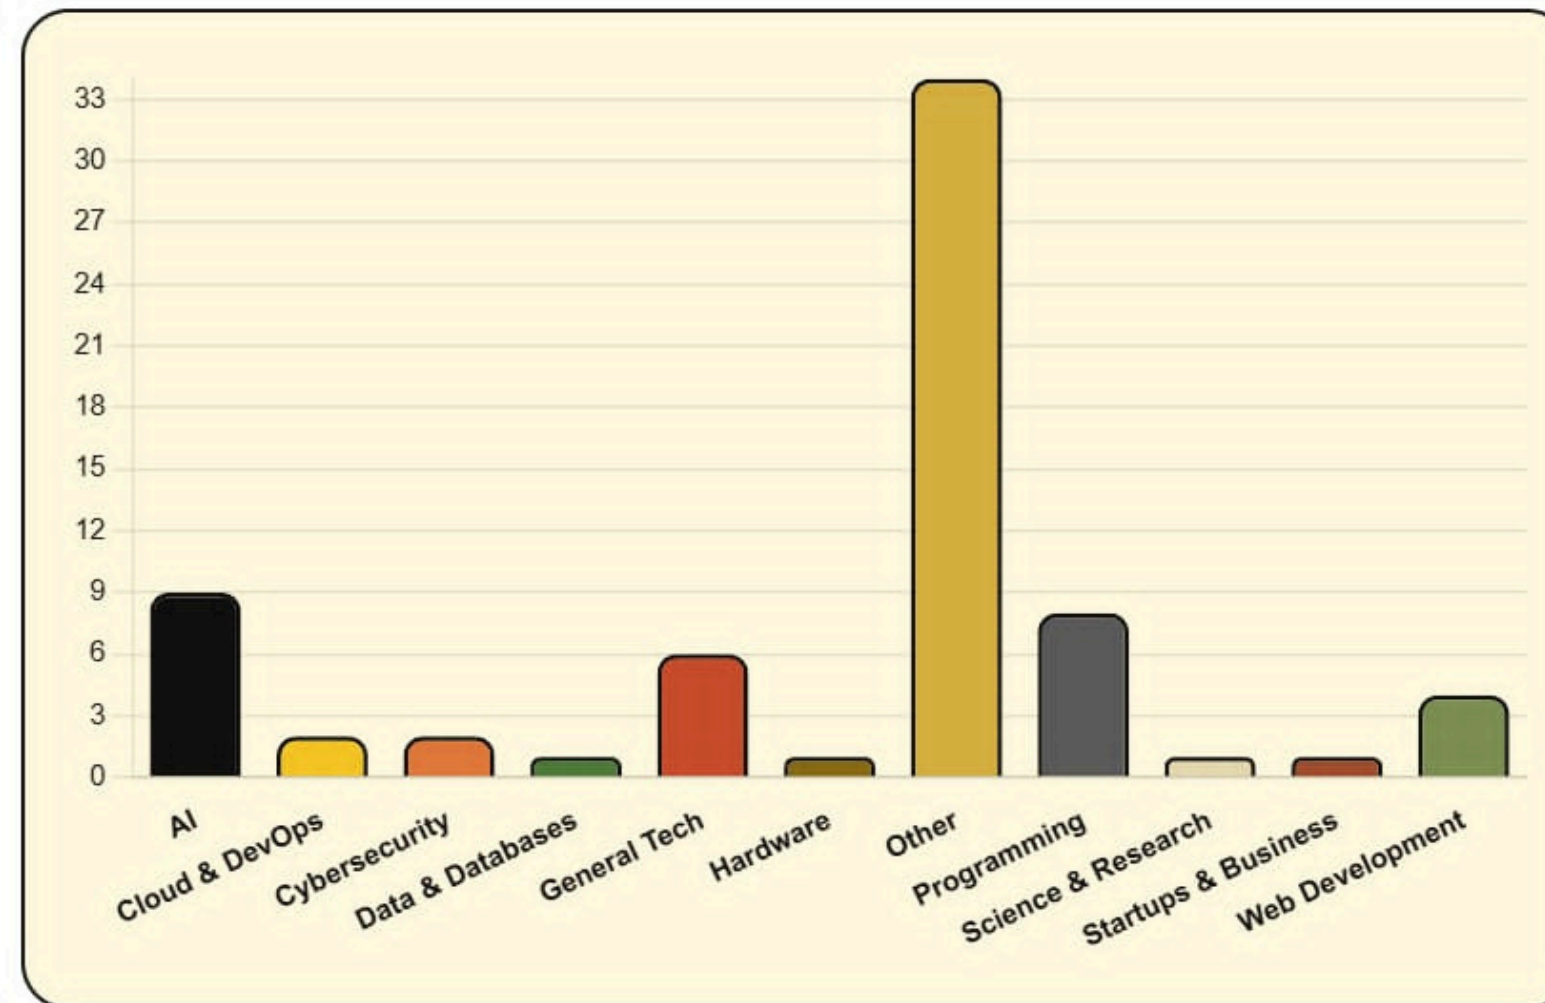

Stories flagged by cybersecurity-

Category and keyword patterns

These panels summarize the current story distribution and the most active keyword matches.

Stories by category

Current distribution of the rule-based classification system.

Top keywords

Most frequent matches in the current dataset.

All Priorities

RANK	TITLE	CATEGORY	KEYWORD	PRIORITY	SCORE	COMMENTS	AUTHOR	DATE	INSPECT
1	It is time to build a new internet	General Tech	internet	Low	6	2	mrmarket	2026-05-22 03:19:53	↗
2	Project Hail Mary — Stellar Navigation Chart	Programming	github	High	599	138	speleo	2026-05-21 17:23:11	↗
3	Using Kagi Search with Low Vision	Other	None	Medium	138	28	speckx	2026-05-21 20:32:16	↗
4	Blog ran on Ubuntu 16.04 for 10 years. I migrated it to FreeBSD	Other	None	Medium	170	94	speckx	2026-05-21 19:54:55	↗
5	Was my \$48K GPU	AI	ai	High	298	223	apwheelee	2026-05-18	↗

6

Tools & Development Phases

- Backend :Python, Flask
- Data collection: Requests, Hacker News API
- Data processing: Python, Pandas, Regex
- Frontend: HTML, CSS, JavaScript
- Visualization: Chart.js
- Storage: CSV
- Versioning: GitHub

7

Added Value & Conclusion

- Not just a scraper
- Monitoring + classification + prioritization
- Useful for cybersecurity awareness
- Exportable structured dataset

Future improvements:

- SQLite database
- Scheduled scraping
- Better NLP classification
- Login/admin mode

Thank You
